Ray Clock Instructions

You can use this to teach kids how to read a clock, to play clock games, or for decoration!

Materials:
- Paper plate
- Orange construction paper
- Yellow construction paper
- Yellow paint or yellow marker
- A bracket
- Googly eyes (Optional)
- A black or orange marker/Sharpie
- Tape
- Scissors

Instructions:
1. Paint/color the plate yellow.
2. Cut about 8 triangles out of the yellow construction paper. Tape them around the edge on the back of the plate.
3. Cut the clock hands in the shape of arrows out of the orange construction paper. Make one slightly larger than the other.
4. Write the numbers of the clock and the tick marks around the edge of the inner part of the clock with a black or orange marker or Sharpie.
5. Stick googly eyes (or draw the eyes) onto the face of the clock. Draw the mouth on. Alternative: draw sunglasses on the face instead of eyes.
6. Align the bottom edges of the two clock hands together, and puncture both of them with the bracket.
7. With the two clock hands attached, push the bracket through the center of the plate and fasten it on the back of the clock.
8. Rotate the hands around the clock to tell time!
